

Graeme Huntley

(714) 272-3469 | huntley.g@northeastern.edu | <https://www.linkedin.com/in/graeme-huntley/> | Seattle, WA

EDUCATION

M.S. in Artificial Intelligence

Anticipated December 2026

Northeastern University, Seattle, WA

- Selected Courses: 5130 Applied Programming & Data Processing for AI, 5100 Foundations of AI, 5800 Algorithms, 6140 Machine Learning
- Active Officer: Graduate Resiliency Club
- Active Teaching Assistant: 5130 Applied Programming & Data Processing for AI

Certificate of Computer Science Fundamentals

June 2025

Seattle University, Seattle, WA

M.S./M.A in Global Health Policy & International Development

May 2021

Brandeis University, Waltham, MA

B.S in Anthropology & Public Health

August 2018

Southern Illinois University Edwardsville, Edwardsville, IL

SKILLS & LANGUAGES

- Python, C++, Java, SQL, NumPy, Pandas, Plotly, Git, Linux, Data Structures, Algorithms

PROJECTS

Cybersecurity Threat Intelligence Platform: "Providence" | C++, Java/Spring Boot, Python, React, Three.js, PostgreSQL, Docker, AWS

- Deployed honeypot fleet across 3 AWS regions, capturing 282,860 attack sessions over 56 days from 13,104 unique IPs across 90+ countries, with planted credentials triggering targeted attacker behaviors for behavioral analysis
- Trained LightGBM classifier on CICIDS-2017 lab data that generalized to production without retraining (0.957+ confidence on benign traffic), serving edge inference at 47μs latency on t3.micro instances via a 602 KB model
- Built full-stack platform with C++17 packet capture engine (gRPC), Spring Boot backend with automated response engine and firewall integration, and React/Three.js 3D threat globe with live WebSocket-driven attack visualization

Chess Engine: "It's Giving Pawn" | Python, NumPy

- Built UCI-compliant chess engine featuring Principal Variation Search with alpha-beta pruning, transposition tables (Zobrist hashing), Late Move Reductions, null move pruning, and quiescence search
- Developed 12-feature position evaluator with phase-aware weighting for king safety, pawn structure, piece mobility, and passed pawn detection
- Integrated Polyglot opening book with pattern detection for 8 common openings, counter-strategy selection, and adaptive time management for tournament play

Business Intelligence Dashboard: "Liquidity Mainframe" | Python, Gradio, Plotly, yfinance

- Built real-time financial analytics dashboard integrating yfinance and Finnhub APIs with 10+ interactive Plotly chart types and custom cyberpunk theming
- Implemented technical indicators (RSI, MACD, Bollinger Bands, moving averages) with automated bullish/bearish signal detection and priority-ranked insights
- Designed multi-source data pipeline supporting CSV/Excel uploads and live API fetching with 15-minute caching layer for rate limit compliance

PROFESSIONAL EXPERIENCE

Institutional Giving Manager

February 2024 – October 2024

Tacoma Arts Museum, Tacoma, WA

- Migrated grant management system from Excel to Monday Nonprofit CRM, reducing pipeline tracking time and enabling real-time visibility into \$1.5M in funding across 60+ applications
- Built funder research matrix consolidating 300+ data points, improving financial forecasting accuracy for annual budget planning
- Led weekly cross-departmental meetings with directors to coordinate funding priorities, resulting in 100% on-time grant submissions
- Coordinated data collection across 4 departments and external stakeholders to compile reporting deliverables for foundation and government funders

Grants Associate

July 2022 – November 2023

Committee For Children, Seattle, WA

- Built CRM database with 300+ funding organizations, enabling leadership to prioritize opportunities and forecast revenue for annual budget planning
- Researched and cataloged 500+ funding opportunities across 3 program areas, creating structured pipeline for Education Policy, R&D, and Partnership teams
- Led cross-departmental go/no-go calls with leadership officers, driving timely grant submissions through structured decision-making process
- Presented grant strategy and funding priorities to leadership during quarterly meetings, aligning team efforts with organizational goals

Grant Writing Intern

May 2020 – August 2021

The Okoa Project, Boston, MA

- Cleaned and restructured raw research datasets for use in federal grant applications, ensuring data quality and compliance with funding requirements
- Delivered daily stand-up progress updates to leadership, maintaining visibility on project milestones and blockers
